

# Ballistic NailScrews®

Speed, Strength and Versatility!

## SPEED

No other screw system can work at the speed of the Ballistic NailScrews® pneumatic nailer. Time, productivity and profits are greatly enhanced. The Ballistic NailScrews® system installs 40% faster than collated screws and 70% faster than bulk screws.

## STRENGTH

Ballistic NailScrews® are manufactured with hardened tempered steel, providing the shear values, tensile strength and the torsional loads required for the appropriate application of your project. The Ballistic NailScrews® provides almost twice the holding power of a ring shank nail.

## VERSATILITY

Ballistic NailScrews® can be used in a wide variety of applications from wood to composite lumber, backer board, underlayment, fencing, sub-floors, pallets and crating with versatility to remove the screws once they have been installed. Works well with wood and light gauge steel 12ga. to 20ga.

Drive Them In, Screw Them Out™

# Ballistic NailScrews®

Drive them in...

Screw them out!

# Ballistic NailScrews®

Used in various Applications!

## Used in SUBFLOORS

Ballistic NailScrews® make short work of installing subflooring. More than twice as fast as collated screws saving you time and labor costs. Ballistic NailScrews® meet ICC-ES criteria for subfloor installation and use in horizontal and vertical shear walls.

## Used in DECKING

Ballistic NailScrews® work in all types of decking. Our exclusive PPG coated deck screws provide maximum corrosion protection against the elements. Stainless Steel and Composite Ballistic NailScrews® are also available in both strip and coil.

## Used in CRATES & MORE!

Ballistic NailScrews® have superior holding power for the assembly of shipping crates, storage building assembly and modular housing applications where screws sometimes need to be removed or adjusted before final assembly is complete. We offer a specialty fastener for both wood and composite fencing guaranteed to work in your application.

## Hidden Deck Fastening System

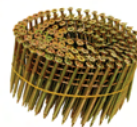

Try our Mantis Clip system today for pre-grooved composite and hardwood decking. Can you really afford to waste labor expenses any longer?

Our Positive Placement Ballistic NailScrews® can be used to install a wide variety of hidden deck fasteners that are fastened at a 45 degree angle. Unlike our competition OUR TOOL can be used to also install joist hanger nails without modification.
